Skills

Empatize

I understand the context of our users, and I put myself in the shoes of each client, buying the cause of their anxiety, fear or frustration when faced with technical difficulties or complex projection. I'm here to help get out of it.

Listen

I may be able to establish conversations and focus on them to get fixes, project results and solutions generating shared understanding with the team and stakeholders.

Collaborate

I love working as a team, being autonomous. Propose and listen to ideas, manage my times and commitments. I love learn and teach new stuff everyday.

Design focused with autonomy

Design with autonomy, focus, collaboration, and confidence as key factors in any type of organization, startups, or teamwork. Goal oriented designer.

Software + Current training

Sketch

Invision

Slack

Zeplin

Code & Programming

HTML / CSS

Javascript

Bootstrap

I like

React

React Native

Someday I want to become a sftwr designer or dev
